Know Your Rights And Hold Your Tempers, Hatfield Advises Middle Creek Area Farmers

At a meeting jointly sponsored by the Lancaster and Lebanon County Farmers Associations last Monday night Hollis A. Hatfield, Administrative Secretary of the Pennsylvania Farmers Association, told about 100 farmers and other interested parties that when dealing with government condemnation procedures a cool head and an informed mind provide the farmer's best defense.

Emotions and tempers have been running high in this Lebanon-Lancaster County community ever since it became known that 2400 (now increased to 2900) acres would be taken by the state for gamelands under Project 70 Hatfield's realistic approach seemed to ease the tension of the meeting somewhat

He pointed out that farmers had certain rights under the new eminent domain law of which they should be aware For example, within thirty days after being served with the notice that his land has been condemned the property owner may file preliminary objections challenging the right of the condemnor to condemn his property Property to be condemned must be appraised by two local realtors, and a just compensation figure reached Where a partial taking of a property is involved, Hatfield suggested that the farmers not make final settlement until they know how the acquired property is to be developed. Then if any damages occur to the remaining land or buildings damage claims can be listed and action taken to correct the situation. The property owner has recourse to the

Musser Exhibit Tops 4-H Club Consv. Roundup

The top exhibit at the Soil and Water Conservation 4-H Club Roundup held Tuesday at the Hotel Brunswick belonged to Gary Musser, fourteen year old son of Mr. and Mrs. Titus Musser, 518 W. Broad St., New Holland Musser, a ninth grader, is in his third year of 4-H Club work, but this is his first year with the Soil and Water group.

Musser's outstanding table-top display was titled "Changing To Conservation" Using concrete in a frame about three by four feet, he depicted a farm that was about 80 per-

Red Rose FFA Elects Officers

The Red Rose Future Farmers of America held their selection of officers on Monday night at the Lampeter-Strasburg High School.

Glenn Weber, sixteen-year-old son of Mr. and Mrs. Andrew Weber of Mohnton R2, was chosen as president to succeed John Frey of Quarryville R2

Weber, a member of Grasslands FFA Chapter, is a junior at Garden Spot High School. He and the other newly-elected officers will be installed during the January meeting.

Other officers elected Monday night were.

Slaton Featured At Kiwanis Farm-City Week Celebration

The Lancaster Kiwanis Club observed Farm-City Week at their regular noon luncheon meeting at the Hotel Brunswick this week, and the featured speaker was Charles Slaton of the U S Soil Conservation Service, Harrisburg.

Slaton presented an illustrated slide talk and stressed the importance of soil and water conservation practices to farm and city people alike.

This is the first year that the New Holland 4-H Soil and Water Conservation Club exhibits have been held in conjunction with the civic club's meeting The outstanding exhibit was shown by Gary Musser, New Holland The 4-H'ers were the luncheon guests of the Kiwanians

Winners of the conservation essay contest sponsored by the Lancaster Kiwanis Club were announced at the luncheon. They were H. Melvin Brene-

Agr. Census Will Measure Changes And Estimate The Trends In County Farming

Probably by this time you have received the many sectioned Agricultural Census form through the mail Its appearance may have scared many farmers half to death But after studying it over, it should have become quickly apparent that its bark was worse than its bite Most of the questions can be answered with a check mark, a word, or one number.

The Census of Agriculture is a detailed survey that is taken by the U S Department of Commerce every five years, and this is the year This survey is designed to yield a great amount of information which will be used to measure the changes in agriculture in the past five years, give some indication of the trends, and aid materially in evaluating the effects of past government farm programs as well as help plan needed new ones

Some of the old familiar questions are missing this year, and some new ones have appeared. For example, you may have noticed that no questions on horses or mules are included for the first time in the 120-year history of the Agricultural Census The 1959 census showed that horses and mules on U.S farms numbered fewer than 3 million, compared with a peak of over 25 million in 1920 Although horses especially seem to be staging a comeback in Pennsylvania—from 50,000 a few years ago to about 100,000 today—they are no longer judged greatly important to the U.S. farm

Trading In Beef Futures Starts

It has been announced that trading in live beef cattle futures will commence on the Chicago Mercantile Exchange on Monday, November 30 On that day futures will be offered on cattle for delivery in April, June, August, and October 1965.

Some authorities seem to feel that this innovation will result in an improvement in the functioning of the cattle industry Others have expressed the opinion that they expect no help from this marketing approach.

Another authority takes a wait-and-see attitude, saying that whether it will help feeders will depend on how many buyers and sellers participate

Pa. S & W Consv. Directors Hold Annual Meeting

The Pennsylvania soil and water conservation district directors held their annual meeting last week at Mount Pocono, Pennsylvania.

Lieutenant Governor Raymond Shafer, speaking to 300 conservationists from 62 districts, praised the work the group was doing and said that state government recognizes the outstanding leadership districts are giving to the conservation of the natural resources of the Commonwealth.

For over a quarter of a century, Shafer said, districts have played a leading role in moving Pennsylvania's conservation work ahead "You can expect even greater assistance from the Commonwealth in your dedicated work," Shafer said

The three-day meeting highlighted the importance of

Weather Forecast

Temperatures for the five-day period Saturday through Wednesday are expected to average near, or slightly above normal. Normal for this time of year is a high of 46 degrees and a low of 29. It will be cold during the first half of the period, moderating toward the end. Precipitation is expected to total less than 1/4 inch. This will occur as scattered showers over the northern mountains Saturday and Sunday, with more general rain toward the end of the period.

Sheep 20 Insufficient volume of any one class to fully test trends, few Utility and Good wooled slaughter ewes $3 00-6 50

You can't keep your eye on the ball and the clock at the same time

New Holland Auction

The Thursday sale at the New Holland Sales Stables progressed normally in spite of the holiday. Receipts were slightly below normal; these included 635 cattle, 170 calves, and 11 sheep. Price trends were steady. This sale was not covered in detail by Market New Service because of the Thanksgiving Day holiday.

At the Nov. 25 sale 179 cows, 13 bulls, and 9 heifers were offered. Fresh Holsteins brought 275-450; Guernseys, 150-235; other breeds, 150 300 Bulls brought 125-225, and heifers, 55-250. The trend was steady.

At the horse sale on Nov. 23, 306 head were received Riding horses brought 85-240; driving horses, 85-200; killers, 4½-5 cents per pound Pony mares brought 25-65, and geldings, 20-50 A steady trend was noted.

Hog receipts at the Nov. 28 sale totaled 367 head and 38 shoats. Hogs retailed at 17-17.50. Wholesale (U. S. 1-3) brought 16-17. Heavyweights, 15-16. Shoats sold for 6-14. The trend was steady.

On the Nov. 23 calf sale 135 head sold at a steady rate. Choice and prime brought 34-37; good and low choice, 26-33.50; standards, 20-26; common, 10-20.

Chicago Cattle

WEEKLY REVIEW

CATTLE — Salable receipts first three days 27,500 compared 25,400 week ago and 24 600 year ago Twelve market receipts 200,000 compared 198,400 week ago and 149,-700 year ago

Compared last Friday, slaughter steers 50-75 lower, heifers steady Cows steady to fully 25 lower, instances 50 off Bulls weak to fully 50 lower Few feeders strong. In the Chicago carlot dressed trade, steer beef steady to 50 lower. Heifer beef steady Cow beef 50-1 00 lower.

Some weakness prevailed on slaughter steers each of the first three days this week. Fairly liberal marketings coupled with one less slaughtering day factors in the downturn. Also, Prices forced sharply higher last Friday as receipts fell well below normal. Marketings first three days this week locally largest in a month Supply 70-75 percent slaughter steers, around 15 percent heifers. Bulk steers on offer 1350 lbs down but run did include a moderate number of loadlots weighing 1375-1550 lbs. All grades of steers under pressure this week but most bearishness on kinds grading average Choice or better particularly loadlots weighing 1100-1200 lbs. overall finish on steers about like last week, Prime making up around 10 percent of the steer crop.

Slaughter steers: Around a

Weekly Broiler Report

Placements In Commonwealth Decline

Placements of broiler chicks in the Keystone State by hatcherymen during the week ending November 21, totaled 844,000 according to the Pennsylvania Crop Reporting Service. This was a decrease of 14 percent from the previous week but an increase of 5 percent from a year ago The 10-week total was 4 percent above the comparable period a year ago Settings for broiler chicks, totaling 1,230,000 eggs, were 3 percent below the previous week and 7 percent below a year earlier. The 3-week total was 6 percent below last year Inshipments of broiler-type chicks the past 10 weeks totaled 365,000 or 56 percent below the comparable period in 1963. Outshipments of 1,402,000 were down 12 percent

Placements in the 22 major producing states, totaling 38,005,000 chicks, were about the same as the previous week and a year ago The 10-week total was 3 percent above last year Settings of 53,347,000 eggs increased 1 percent from the previous week but was about the same as a year ago The 3-week total was 1 percent below a year ago.

Eastern Pa. and N. J.

Area Holsteins Set New Production Levels

The Holstein Friesian Association of America recently reported that the cows in county herds had new, officially recognized milk and butterfat records:

Spring Lawn Triumph Wovation 4295220, a six-year-old, owned by Jay C. Garber, Lancaster, produced 19,839 lbs. of milk and 714 lbs. of butterfat in 365 days.

Elroc Patsy Follow On 39-21485, a nine-year-old, ownedof butterfat in 305 days.

by H. E. & Maybelle Kettering, Lititz, produced 15,830 lbs. of milk and 627 lbs. of butterfat in 327 days.

Lady Rag Apple Butter Girl 4629675, a five-year-old, owned by Vernon R. Umble, Parkesburg, produced 15,228 lbs. of milk and 664 lbs. of butterfat in 279 days.

Valley Run Lad Irene 48-21279, a four-year-old, owned by Arthur D. & Mary K. Wenger, Manheim, produced 20,000 lbs. of milk and 647 lbs.

Here's News For Cattle Feeders!

Purina's New "Built-To-Fit" Special Steer Fatenas

Here is just one of nearly 300 test pens of cattle used to develop the new Special Steer Fatenas at Purina's Research Farm. Four years of testing involved more than 2500 test cattle.

Each of these new cattle supplements is formulated for a specific kind of grain and roughage. Even the size of your cattle is considered in selecting the right one for you to feed!

Results? These new Special Steer Fatenas have set all-time Purina performance records in 4 years of tests. For example, the new Steer Fatena "Built-to-Fit" corn or milo rations, fed with poor quality roughages, produced 6.4% faster gains on 10.7% less feed! These extra results were worth $11.40 more per steer on a $20 cattle market with 700 lb. yearlings fed 120 days!

The new Steer Fatena "Built-to-Fit" barley rations produced equally high results at a lower feed cost than ever before!

Whether you bunk-feed or self-feed your cattle, there's a new Special Steer Fatena "Built-to-Fit" your own feeding conditions. Come in and find out which is formulated to step up your feeding efficiency!

From Where We Stand . . .

What Is Lancaster County?

The Pennsylvania Almanac says Lancaster is the greatest crop producing, non-irrigated county in the United States This we all know; although we may at times take it for granted, we are certainly grateful for its abundant fertility.

But Lancaster County has more than a unique soil fertility. It has the people, without which the world's most fertile soil would be barren.

The agricultural phenomenon that is Lancaster County didn't just happen. It took people with a purpose to bring about such abundance You know who these original people were for it was their seeds which produced you You carry their names, and you walk the same fields and furrows in which they walked. Many of your richest fields today were cleared by their back-breaking labor.

It seems to us that we get so involved with the demands of today that we tend to forget there was ever a yesterday Yet it was yesterday that made today just as surely as today will father tomorrow.

The Almanac gives us a few other facts about our county. It was named after Lancashire, England; it was the fourth organized county in Pennsylvania, after Bucks, Chester and Philadelphia; it was formed from part of Chester County; it has produced one President, James Buchanan; it produces ninety percent of the nation's cigar leaf tobacco; and most interesting, Lancaster City was for one hectic night, when the British over-ran Philadelphia, the capital of our desperate young republic that so nearly died aborning.

But the people; who were they? The Almanac says only that the earliest settlers were Swiss and French, followed in 1717-1723 by German farmers from the Rhine, and that it was this combination that produced the "Pennsylvania Dutch". As Professor Schnitzel says, "that ain't much to go on "We'd like to know much more about these people, your ancestors. Would you share with us, and with our readers, some of your rich heritage? In many households there are old handwritten records and letters. Though ancient and dusty perhaps, these words were written by the people in who's footsteps we now walk. What they were, to a great extent, has effected what we are. Perhaps understanding them could help us understand ourselves a little better. At any rate they deserve better than to be idly forgotten.

We think that our personal history has much yet to say to us. With your help it can speak again through these pages. We ask that you reexamine the written records that history has left you, sift out the facts that tell the story of your own heritage, and pass on to us that information which you think would be of interest to our readers Please don't send us any documents or pictures through the mail! We would prefer that these do not leave your keeping. If it would be desirable to reproduce these we would rather do so while they are in your possession. In that way there would be no risk of loss or damage to these irreplaceable objects.

Whether or not such historical material will appear in this paper depends upon your interest. We think that this rich vein of folklore should be tapped because of the benefits it holds for the future, aside from purely local interest. Our children should know and understand our past for is it not their heritage too?

What Do **YOU** Think?

Rural Poverty

As part of his Great Society, President Johnson plans to boom all of rural America. The aim of this boom will be to push opportunity for the rural people that will equal the urban opportunities. This will be done in the form of government-sponsored credit through redevelopment funds, FHA housing, water facilities, anti-pollution programs, small business loans, etc.

A recent report by USDA's Economic Research Service has blue-printed the problem of rural inequities. It reports that there are 17.4 million rural persons with family incomes below $3000 per year, and suggests that programs pitched toward upgrading the economic conditions of these people can go a long way toward solving the problems of rural poverty.

This war on rural poverty is not solely a Johnson creation; Eisenhower and Kennedy also fought it. But Johnson plans to go after it in a big way, on a par with urban renewal. The Economic Research Service report showed that the number of persons with poverty-level incomes had been reduced 40 percent from 1947-1962; without a crash program.

The report also shows the complex problems of rural poverty. These include less dense populations and the resulting adverse effect on employment opportunities; the advanced age of the heads of the poorer families — one-third of all the heads of poor families five years ago were at least 65 years old and 40 percent of these were rural folk; the migration of the young from the rural areas thus depleting the chance for creative development of those areas.

Whether or not you agree with Johnson's approach to this problem, it will not be hard to see that this boom will provide some hitherto non-existent business opportunities in the rural areas. But this will probably be of little immediate consequence to our area, since we doubt that Lancaster County rates very high in the rural poverty department. This plan will particularly attack the isolated little pockets of poverty that exist across the land

A copy of the research report "Poverty in Rural Areas of the United States", AER No. 63, may be obtained by writing to the Office of Information, USDA, Washington, D. C. 20250.

making Pennsylvania a better place in which to live Robert C Lott, President of the Association of Soil and Water Conservation District Directors, told the group that by developing soil and water resources, conserving agricultural soils, and by developing adequate recreational facilities they were improving the liveability of the Commonwealth for agriculture, industry, and the community

Lott added that today over 30,000 farmers are cooperating with local soil and water conservation districts in the state. Thirty-four counties have made application for watershed protection and flood prevention covering over three million acres of land in Pennsylvania, Lott said.

A Lancaster County conservationist, Henry H. Hackman, received a citation from the association of directors. Hackman, of Manheim R2, was presented with the citation by Amos H Funk, Millersville R1, president of the Lancaster County Soil Conservation District The award was based on Hackmans achievement over the years in the field of conservation

Hackman is a member of the faculty at Donegal High School, Mount Joy.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Gospel in Brief

Lesson for November 29, 1964

Background Scripture: Titus 1 1-3; 2 11-14, 3 4-8a
Devotional Reading: Ephesians 2 1-10.

THIS WEEK we shall do something a little different. This is an invitation to study the Bible together. The verses under "Background Scripture" are remarkable in bringing out, in their brief sentences, many of the most vital truths taught by the Christian Church. Taught to the church, we ought to say, first of all, for what the church teaches she first learned, at least in vital germ, from her own first teacher, Paul, and above him, our Lord himself.

Dr. Foreman

The grace of God

The word of "grace" often means gracefulness, as when we speak of the grace of a violinist's work, or the invitation of a hostess. In the New Testament it means graciousness, a quality some people have without knowing it, the quality we associate with true aristocracy. We can say for instance that Dean Rusk is a more gracious character than Gromyko. Grace is not the same thing as goodness; some people can be mighty good without being very gracious. Grace is goodness come to life, shining. In the New Testament the grace (Graciousness) of God is mentioned far oftener than the grace of men. (Why should this be so?) The New Testament speaks often of the grace of God as something which has up to now not been well known or understood. For the crowning act of God's grace is the gift of his son, Jesus Christ, the living, walking grace of God in human living. The supreme moment of that grace, of course, is Christ's identifying himself with sinners and being willing to "give his life a ransom for many" — to use his own words. The grace of God and the Saviorhood of Jesus are not two different things; they might almost be called, from the Christian point of view, the same thing.

How Christian life begins

Paul speaks here also of how the Christian life begins. It starts with what theologians call "justification," which literally means a judge's verdict of "Not Guilty". Justification refers to man's status in God's sight, not to his state. A newborn baby is in a wretched state. He badly needs a bath. But he is his parents' much-loved child all the same. They do not demand that he must do something lovable before they love him; they welcome him with love even before he is born. God is like that. He loved us before we were born not because of what we have done but because he is love.

How Christian life operator

The life of God in the life of man; how does this operate? There is mystery here, to be sure; but some things are clear. One truth is that it means to be daily, even constantly renewed. The Christian's life is not an automatic business that starts with one big Bang! and keeps on with no further effort. The greatest Christians are those who feel most strongly the need of being continually re-created. This has its definite effects. The Christian is one who becomes, with the passage of time, more and more godly, that is, God-like. This is so tremendnous we sometimes shrink from it. We find it enough to be like our parents or someone else we admire. Our heavenly Father wants us most of all to be like himself. He wants us to love what he loves and to hate what he hates. Finally (though much here has not been touched) the Christian lives a life of hope. He expects Christ to be Lord of All. No Christian ever wept that he was born too late for the Golden Age. The Golden Age for us is not in some lost yesterday, it is the great tomorrow, when all tears have been wiped away and God shall be all in all.

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Prevent Farm Fires

With the winter's supply of hay and feed in the barn, and most barns filled to capacity with livestock, it is very important to practice fire prevention. We especially call attention to the stove in the tobacco cellar and the condition of the stove pipe and chimney. Be sure all joints are tight and all masonry in place. The investment in several hand fire extinguishers is a good one to prevent serious loss. Be sure the extinguishers are in good working condition and that everyone around the farm and home knows where they are located and how to operate them.

To Use Pig And Lamb Brooders

Newly-born pigs and lambs need some protection if born during extremely cold weather. The use of the heat lamp or brooder-type heater has saved many head of livestock We caution breeders, however, about the danger of these lamps if not securely fastened and if within reach of livestock; they could be a serious fire hazard. If the young animals are given a chance to enjoy the warmth and the dryness of the brooder for the first week, they will get off to a faster start

To Study Farm Income Tax Reports

Many farmers could gain from a better understanding of the income tax structure We are not posing as authorities in this area, but feel that many could benefit from more knowledge of the various deductions and reporting procedures A short course on the subject is to be given at Penn State University on December 7 and 8.

To Do Forage Testing

Most farmers have heard of this practice but far too many dairymen are not taking advantage of this chance to become more efficient and to make more net returns. Here at the beginning of the winter feeding season we feel that many could benefit from the testing service The grain recommendation that accompanies the forage report is a very good guide to the needs of the herd in addition to the forages being fed. This might be one farm practice that could help many dairymen stay in the business

Performance
Is The Key To Low Costs

This applies to broiler feeds, too, of course.

Below are the results of 20 recently marketed broiler flocks which indicate what can be done with

REPORT ON 4-H WILDLIFE CLUB MEETING
by Eric Stoner

The Lancaster County 4-H Wildlife Club met November 18 at the home of club leader, Melvin Long, Lititz R3. Demonstrations were given by Annette Long on bird feeding, and by Eric Stoner on muskrat skinning

Gifts will be exchanged at the Christmas party on December 16, at the home of H. Raymond Stoner Mr Plastow, club extension leader, will show slides of county farms at that meeting

On December 1, at 7:30 p.m. at the Poultry Center, tryouts will be held for the annual 4-H play This year the play will be "The Marriage Machine," and will be directed by Mr. Robert Schappell. All members interested in trying out should attend to help make the play another success

County Guernsey Ass'n Reelects Breneman

Robert A. Breneman Strasburg R1, was reelected to his second term as president of the Lancaster County Guernsey Breeders Association, Monday night, at a reorganization meeting of the board of directors.

Robert Ankrum, Wakefield, was elected vice president. Jesse G Balmer, Lititz R4, succeeded K D Linde, Oxford R1, as secretary-treasurer of the breed association.

The meeting was held at the Breneman farm.

● Agr. Census

(Continued from Page 1)

economy as a whole

For the first time questions appear on such things as pesticide use on crops and livestock, and income received from recreational enterprises such as hunting, fishing, boarding and swimming privileges

Three crew leaders were announced for Lancaster County about one month ago They are Mrs Doris L Myers, Landisville, Robert Stamm, Lincoln, Robert B McSparran, Peach Bottom Recently, 36 enumerators were named One of these will visit each farm in Lancaster County and pick up the census form that was received in the mail If a farmer has any problems in completing the questionnaire the enumerator will help him answer the problem questions. The 36 countians so appointed are

Bernard Devaney, Mrs. Jean Miller, John Forrest, Mrs Dorothy Wetzel, Mrs Joyce Draege, Mrs Pearl Kahley, Mrs Nancy Herclerode, Mrs Natalie Destafano, Mrs Louise Boas

Mrs Mary Schreiber, Louis Ferguson, Mrs Pauline Ritz, Howard Kline, Mrs Doris Gaenzle, Mrs Eva Kauffman, Mrs Carmelita Joyce, Mrs. Arlene Hershock, Mrs Luetta Troop, Kenneth Wiker, Alfred Kretchler, Mrs. Mary Coldren, Mrs. Alberta Poole, Mrs. Ruth Matthews, Harry Jones, John Moss, Mrs Reva Friedman, Mrs Martha Fasnacht, Mrs Jane Feister, Mrs Evelyn Eby.

Mrs Mary Meckley Mrs Clara Frankhouser, Mrs Mildred Eismann, Mrs Marion Sauder, Mrs Marguerite Musser, Mrs Edith Burkheimer and Earl Root

The enumerators began their farm calls of November 9 in Lancaster County According to the proposed schedule they are due to finish their rounds by December 17 Then all of the collected forms will be sent to Washington, D C for processing

With the new sophisticated data processing machines in use today the census figures will yield more information than ever before and will do so faster than could have been done previously.

Early results of the 1964 Census of Agriculture for each state and county will be published beginning in April, 1965 Release of the early results should be completed by the end of 1965 Final reports bound in book form by states will be available starting in July, 1965 Publication of these will be completed by June, 1966.

In the 1959 census, Pennsylvania counties were at or near the top nationally in a number of items Lancaster County was first in tobacco, both acreage and harvest; second in chickens on farms, in number and value of eggs sold, and in total value of poultry and poultry products sold; third in horses and mules on farms, seventh in value of dairy products; tenth in number of milk cows; 13th in value of all farm products sold, and was among the top 25 in number of cattle and calves on farms, and in both number and value of those sold.

● Know Your Rights

(Continued from Page 1)

courts to assure just compensation on all damage claims.

There is no one answer to all settlement claims, Hatfield cautioned. Every settlement must be handled on an individual basis.

Hatfield also pointed out to the farmers that to avoid undue tax stress on the community of property owners that remain in possession of their land after the project has been completed, the state has set aside funds to ease the tax void left by the departing land owners. The state then makes up the tax deficit until the remaining land values have recovered sufficiently to handle it.

In closing, Hatfield reminded the group that the government has the right to take this land for public use. And the farmers can assure themselves the best possible deal by treating all of the involved parties in a friendly, businesslike manner. Nothing, he said, will be gained by lost tempers and by words and actions that may later be regretted.

Left-Over Turkey Favorites

SPENCE

Following a bountiful harvest, the first settlers gave thanks at a special feast. Today we celebrate Thanksgiving Day with the traditional family favorite foods. Although accompaniments may vary, a roasted stuffed turkey is usually found on every Thanksgiving table And it usually happens that there are turkey left-overs. If you're having friends in for a special luncheon or buffet supper during the holiday weekend you need not be ashamed to serve them left-over turkey if you serve a luscious Cranberry-Gobbler Salad Made ahead, it's easy on the hostess, and its colorful two-layers is most appetizing on your buffet table.

CRANBERRY GOBBLER SALAD

First Layer
- 1 package (3 oz) orange-flavored gelatin
- 1 cup boiling water
- 3 tablespoons sugar
- 1 tablespoon lemon juice
- 1 package (10 oz) frozen cranberry-orange relish, thawed

Second Layer
- 1 package (3 oz.) orange-flavored gelatin
- ⅓ cup boiling water
- 1½ cups cottage cheese, sieved
- 2 cups diced cooked turkey
- ¾ cup diced celery
- 2 teaspoons lemon juice
- 1 cup dairy sour cream

For first layer Dissolve gelatin in boiling water Add sugar, lemon juice and ¾ cup cranberry-orange relish. (Save the remaining relish to use in second layer) Pour into mold which has been rinsed with cold water, chill until set. For second layer Dissolve gelatin in ⅓ cup boiling water Stir in cottage cheese, turkey, celery, lemon juice and remaining cranberry-orange relish Chill until jelly-like consistency In a chilled bowl whip sour cream until peaks form (takes about 10 minutes). Fold gelatin mixture into whipped sour cream. Pour over first layer. Chill until firm Makes 8 to 10 servings.

* * *

RICH TURKEY HASH
- 1½ cups chopped roasted turkey
- 2 tablespoons chopped onion
- 1 tablespoon chopped green pepper
- 2 tablespoons butter
- 1 tablespoon chopped pimiento
- 1½ cups toasted bread cubes
- ½ cup cream

Cook onion and green pepper in melted butter in a skillet until tender. Add pimiento and turkey. Stir until mixture is hot. Mix in bread cubes. Pour cream over hash. Cook over very low heat until cream is absorbed. Serve hot. Makes 4 servings.

* * *

TURKEY CRUNCH
- 3 cups diced cooked turkey
- 4 ounce can mushroom stems and pieces, drained
- 1½ cup chopped celery
- ¼ cup chopped onion
- ¼ cup chopped green pepper
- 2 ounce jar sliced pimiento, drained
- ½ teaspoon poultry seasoning
- 2 cans (10½ oz) condensed cream of mushroom soup
- 1 cup milk
- 3 ounce can chow mein noodles

Into a 2-quart casserole (rubbed with butter) combine the turkey, mushrooms, celery, onion, green pepper, pimiento. and poultry seasoning Blend together mushroom soup and milk Pour over the turkey mixture. Sprinkle chow mein noodles around the edge of the casserole. Bake in a slow oven (325 degrees) 40 minutes. Decorate with green pepper and pimiento. Makes 6 servings.

* * *

TURKEY MACARONI LOAF
- 1½ cups hot milk
- ¼ cup fat
- 4 eggs, well beaten
- 1 cup soft bread crumbs
- 1 cup grated cheese (¼ pound)
- 2 cups diced cooked turkey
- 2 cups cooked macaroni or noodles
- 2 tablespoons chopped parsley
- 1 small onion, finely chopped
- 1 tablespoon chopped pimiento
- 1 teaspoon salt
- ⅛ teaspoon pepper
- ½ teaspoon monosodium glutamate, optional

Melt fat in the hot milk. Combine the remaining ingredients. Pour milk and fat over mixture, stirring constantly Pour into 2 2½x8x3½ inch loaf pan. Set in a pan of hot water. Bake in a moderate oven (350 degrees) until a knife inserted halfway between center and outside edge comes out clean, 50 to 60 minutes. Let stand in pan about 5 minutes before inverting on platter. Slice or cut in squares. Serve plain or with mushroom sauce. 8 to 10 servings.

* * *

GOURMET SANDWICH LOAF
- 4 hard-cooked eggs
- 1 cup finely chopped cooked turkey

● For The Farm Wife

(Continued from Page 8)

¼ cup chopped sweet pickles or pickle relish
1 can (10 to 12 oz.) cream of mushroom soup
Salt and pepper
12 slices bread
2 tablespoons softened butter or margarine
¼ cup milk

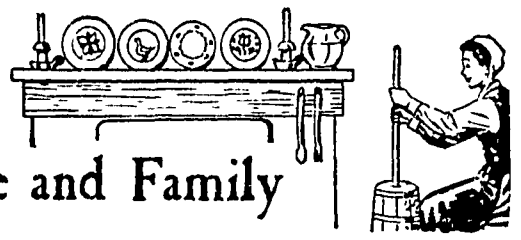
Chop 2 of the eggs. Combine with turkey, pickles and half of the soup. Season to taste with salt and pepper. Trim crusts from bread and cut slices in half to make 24 pieces. Place 6 pieces of bread close together on baking sheet or heat-proof serving platter. Spread with turkey mixture. Top with layer of bread. Repeat until there are 3 layers of turkey and 4 layers of bread Brush top with the softened butter Bake in a moderate oven (375 degrees) until lightly browned, 15 minutes. Blend milk with remaining soup Heat to boiling. Add remaining chopped eggs. Serve over 6 sandwiches.

* * *

PRESSED TURKEY

1 envelope unflavored gelatin
¼ cup water
2 cups boiling turkey broth
Salt and pepper
4 hard-cooked eggs
2 cups finely chopped cooked turkey
1 cup finely diced celery
¼ cup finely chopped green pepper or parsley

Soften gelatin in the ¼ cup water. Add softened gelatin to boiling broth and stir until gelatin is thoroughly dissolved. Season to taste. Cool. Chop egg yolks and whites separately. Arrange in layers in greased loaf pan (about 8x4½x3 inches) in this order half the turkey, egg whites, celery and green pepper mixed together, egg yolks and remaining turkey Season egg and celery layers with salt and pepper. Carefully pour in broth so as not to disturb the layers Cover and chill overnight Unmold and slice to serve. 10 servings.



For the Farm Wife and Family

Ladies, Have You Heard? . . .

By: Doris Thomas, Extension Home Economist

THOMAS

Fluffing Of Carpet Or Rug Is Normal

Your carpet or rug is not falling apart when you notice it fluffing This is normal for new carpets and rugs Fluffing takes place when a rug sheds lint that has been left in the fabric

Carpet yarn is made of various lengths of fibers When pile loops are cut, some short ends are left in the fabric So during the first few months you have your rug or carpet, it sheds this lint as it works to the surface But, this isn't a carpet defect and it won't affect the wear or appearance of the carpet.

Safety Reminders For The Home

Stairs are not designed for storage . . keep steps free from all items all the time. If you have basement stairs without a guard rail, spend a few dollars and a few hour's work building a guard rail It will be the best investment in safety you can make.

When carrying loads of articles up or down stairs, keep the loads small and carry them to the side so you can see each step

Take time to wipe up spills on the kitchen floor

Avoid scatter rugs, they may turn into flying rugs and if this happens their decorative value can be offset by medical costs in case of an accident

A good stepladder is a worthwhile investment A chair or box is a poor substitute and can be a costly one

Worth Knowing

Potatoes cooked in their jackets are richest in vitamin and mineral content But, if you must pare them, keep the parings thin and cook the potatoes as soon as possible after paring Cook in as little water as possible and use the cooking liquid in soups and gravies

It's wise to start cooking potatoes in boiling water And when the water has reached boiling, reduce the heat to just bubbling — never violently boil a potato. Boiling cooks the outside before the inside, and by the time the inside is

Witmer Honored By Pennsylvania Grassland Club

Raymond F. Witmer, RD 1 Willow Street, was one of five state farmers to receive the Outstanding Grassland Farmer award at the Pennsylvania Grassland Conference held at Penn State this week.

Witmer owns and operates a 130-acre, 90-head Guernsey cattle breeding farm, and milks about 49 head at the present time. His herd has consistently ranked among the top producers through the years.

Preliminary evaluation of the Witmer farm qualified him for participation in the grassland competition. This was made last summer by Arnold G. Lueck, Associate County Agent and John Yocum, Supervisor of Penn State's Southeastern Field Research Laboratory. Scoring was based on the entire farm operation, not on individual fields.

In the evaluation all phases of grassland farming are considered: forage production; harvesting; storage; and practices related to the utilization of forage in milk production.

Each year the Pennsylvania Grassland Council selects the five outstanding grassland farmers at the Conference at Penn State University. These winners are awarded a plaque and automatically become members of the Pennsylvania Grassland Club.

● Musser

(Continued from Page 1)

cent under conservation practices. He had built in elaborate slopes and grades; had a stream flowing through the farm and showed how to handle that problem; he showed how to handle run-off water with diversion ditches and a vegetated waterway; he had a farm pond for irrigation; he showed contour planting and strip cropping; then for contrast, he included one corner of the farm that was not yet under conservation, with sloping ground which showed the gullied effect of advanced soil erosion.

Judging was on the Danish system and each of the other six contestants qualified for either a blue or red ribbon

Other blue ribbon winners were Carl Campbell, New Holland, who depicted a grassland waterway; John Campbell, New Holland, who demonstrated the variation in organic matter in soils from woodland, from barren land, and from a cultivated field; Robert Fisher, R. D. 1 East Earl, who compared the water-holding capacity of soils with and without organic matter.

Winners of the red ribbons were: Jay Marlin Bollinger, R. D. 2 Denver, showing soil types and moisture effects; Eugene Bollinger, R. D. 2 Denver, who compared the water-holding ability of soil samples from an uncultivated fence row and from a cultivated field; David Zimmerman, R. D. 1 Reinholds, who contrasted the settling rate of soil from a grass field with soil from a cultivated field.

FULTON GRANGE HOLD CORN & PIE NIGHT

Fulton Grange #66 held their regular meeting November 23 at their hall in Oakryn, Pa. A donation was voted to the Tuberculosis and Health Society of Lancaster County. Corn and Pie Night was observed. The Home Economics Committee was in charge of the pie contest and Mrs. Doris W. Thomas, Associate Extension Home Economist of Lancaster Co., judged the pies. Winners were: Spiced pumpkin 1. Mrs. Ambrose Giffing, 2. Mrs. Marian Ankrim; Plain pumpkin 1. Mrs. Mary Sinclair, 2. Mrs. Eleanor Beck; Apple 1. Mrs. Gyles Brown, 2. Mrs. Charles McSparran.

Clifford Holloway Jr. was in charge of the corn contest. John Hoffman, Quarryville, judged the corn and awarded prizes to: Best single ear 1. John Galbreath, 2. Thomas Galbreath; Best ten ear exhibit 1. James King, 2. Jesse Wood.

Mrs. Jesse Wood, Lecturer, presented the program which opened with group singing; Mrs. Joseph Sinclair gave a reading "A Good Thanksgiving." Mrs Doris W. Thomas spoke on "Some Things The Extension Office Has To Offer The People of Lancaster County." John Hoffman gave "Pointers On How To Grow Good Corn" Mrs Stanley Stauffer Jr conducted games.

There will be a meeting of current officers and committees at the Grange Hall Monday, Nov 30, 8 p.m

Miss Carol Sensenig, Fulton Grange's contestant in the Miss Solanco contest Nov. 28 will present her act at the next meeting The theme of the program will be Guatamala and a collection will be taken for the "Goats For Guatamala" project Christmas gifts for the State Hospitals will also be brought to the next meeting.

Farm Women Soc. #3 Held Ward Party At H'bg. State Institution

On November 19 the Society of Farm Women Group No. 3 held a ward party at the Harrisburg State Institution.

The group prepared 300 sandwiches, 15 dozen cupcakes, plus a beverage. They provided 165 gifts for prizes for the games, plus candies and gum. A large birthday cake was presented for those patients having birthdays in November, and special birthday gifts were given. One-hundred and forty women were entertained at the party which was under the supervision of the following: Mrs. Harry Usner, Mrs. William Eberly, Mrs. Ivan Eberly, Mrs Harry Palm, Mrs. Lloyd Martin, Mrs Earl Latschar, Mrs Esther Petticoffer, Mrs. Charles Wechter, Mrs. Clarence Stauffer, Mrs. Willis Stober, Mrs. Gilbert Paul, Mrs. Harvey Gehman, and Mrs. Doris Miller.

At the regular November meeting of Society No. 3 the group heard Rev. C. E. Wonderley, Administrator of Lancaster County Home and Hospital For The Aged, speak on "Institutional care for the aged."

A new member, Mrs. Robert Gregory, was admitted into the Group by invitation.

The Homemakers Meeting was set for November 30, 7:30 p m, in Fellowship Hall of Grace Lutheran Church, Lancaster.

Delegates were elected to the Annual State Convention to be held in Harrisburg January 11-12· they were Mrs. John Edwards and Mrs. Robert Hollinger, with Mrs. Robert Gregory selected as alternate.

The next meeting, the annual Christmas party for members and children, will be held in the Social Building of Swamp U C C near Reinholds.

Glatfelter Co. Again Will Offer Seedlings

Farmers of Lancaster County are being reminded that right now is the time to plan for tree planting to be done in the spring of 1965 As in past years, The Glatfelter Pulp Wood Company of Spring Grove Pa., will again furnish free tree seedlings to any interested and qualified landowner Since the inception in 1951 of this Company program, more than seven million seedlings have been furnished to landowners in 13 southcentral Pennsylvania counties

Tree species available this year under the program are white pine, Austrian pine, Banks pine, pitch pine, Norway spruce white spruce, Japanese larch, European larch and Virginia pine. Orders are filled on a first-come basis. All trees are purchased by the Glatfelter Company from the Pennsylvania Department of Forests and Waters. The Company imposes no restrictions of any kind, but the landowner planting the seedlings must comply with normal state regulations regarding these trees. That is, they may not be used for Christmas trees, decorative purposes or for windbreaks. All trees are the property of the landowner and he may cut them at a future date for any wood products he desires.

Landowners who are planning to plant trees in 1965, and wish to receive free tree seedlings can obtain information about placing their orders from their County Agent, County Soil Conservation District office, or by writing to The Glatfelter Pulp Wood Company, Spring Grove, Pa.

HOME ECONOMICS EXTENSION SERVICE TO HOLD ANNUAL CHRISTMAS PROGRAM

The Lancaster County Agricultural and Home Economics Extension Service will hold its annual Christmas program on Monday, November 30, in the Fellowship Hall of the Grace Lutheran Church, North Queen and James Streets, Lancaster

The doors will open at 7 30 p m allowing time for browsing among the exhibits of Christmas decorations and gifts that will be displayed by Farm Women Societies and Homemaker Clubs in the county.

The program will begin at 8 15 p m and will feature foreign students from France, Holland and Kenya, who will tell how Christmas is celebrated in their native countries.

All interested person are urged to attend.

● Have You Heard?

(Continued from Page 9)

tender the outside is overcooked. The smaller the pieces, the quicker they cook. So if you are in a hurry, cut potatoes into halves, quarters, or cubes . . . but do not increase the cooking temperature.

● Trading In Beef

(Continued from Page 1)

The brokerage firms point out that future buying will enable the beef cattle industry to use the valuable tool of "hedging", thus giving them a greater price protection than was previously possible

As more information on this marketing process becomes available we will pass it along

Hoffman HPS GRASSLAND SEED FORMULAS FOR HAY • PASTURE • SILAGE

There are 13 different HPS Formulas

Select the one that meets your requirements

The Story Behind . . . .

HPS FORMULAS

As farming has become more competitive, and profit margins have dwindled, farmers have had to aim for ever higher returns from grassland acreage, just as they have on cultivated crops This need for greater productivity resulted in Hoffman HPS Formulas.

Hoffman has, for years, been a leader in introducing new, heavier-producing varieties of alfalfas, clovers and grasses These "straight" items continue to be important staples in the Hoffman line.

We began to find, however, an increasing call for combinations of grasses and legumes to meet specific situations Our attention was then focused on the scientific formulation of such combinations. The end result was the Hoffman HPS Formulas — for more profitable yields of Hay/Pasture/Silage

In arriving at specific HPS formulations, we considered the recommendations of Experiment Stations in the states in the Hoffman selling area. We studied the preferences of our customers over the years, and the results they achieved. Field tests were studied.

Each new bit of evidence was carefully evaluated. Out of this broad program of research and practical on-farm results came Hoffman HPS Formulas — each designed to do an outstanding job in meeting a specific need.

ED REDCAY SHOWN WITH THE ANGUS CALF HE WON in the Ephrata Jaycees 2nd Annual Steer Contest Presenting the steer for the Jaycees is Jack Lee, chairman of the Steer Project Committee.

Ed Redcay Wins Ephrata Jaycees FFA Calf Award

Last Wednesday afternoon Edward Redcay was named winner of the Ephrata Jaycees 2nd Annual Steer Award The steer, a Black Angus, was presented to the Cloister Chapter sophomore by Jack Lee, Chairman of the Jaycees Steer Project. Redcay is the 15-year old son of Mr. and Mrs. John Redcay, Reinholds.

The 480-pound steer was purchased at the Lancaster Stockyard Feeder Calf Sale It was consigned by Old Home Manor Farm, Indiana County

Five boys applied to compete for the calf Each boy was interviewed by the Jaycee committee and Redcay was selected as the winner The only restriction placed upon the winner is that he must agree to show the calf at the Ephrata Fair and at the Livestock Exposition, and the steer should be sold at the latter

Last year's winner of the Jaycee calf was Dick Ritter, R D 3, Ephrata

DO YOUR COWS OWE YOU MONEY?

You probably don't think of your cows as bankers, but if you put them on the Pioneer Feeding Program, they can be a sure source of steady, extra income. The goal of this high-nutrient feeding program is simple — more milk per cow. According to dairy specialists, 9 out of 10 cows don't get enough feed, or the proper kind of feed, to produce up to their genetic capacity. If this is the case with your herd, you may be getting 2,000 pounds of milk less, per cow per year, than you should. The Pioneer Feeding Program is based on increasing feed allowance as long as milk production increases **profitably.** For example, as little as 600 pounds of feed invested in a dry cow returns as much as 2,000 pounds of milk. Your milking herd will respond equally well when you challenge them to milk right up to their capacity. **We'll be happy to show you how you can milk your cows for all their worth. We've done it for your neighbors in this community.** Just give us a call or stop in. We're friendly, too.

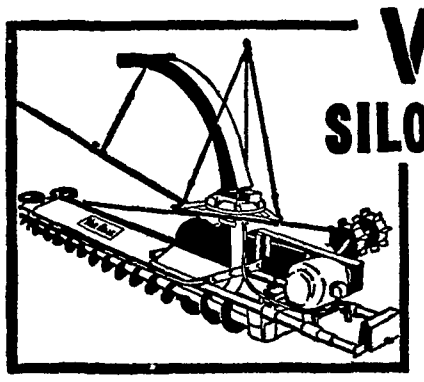
Complete automatic feeding for DAIRY COWS and CATTLE!

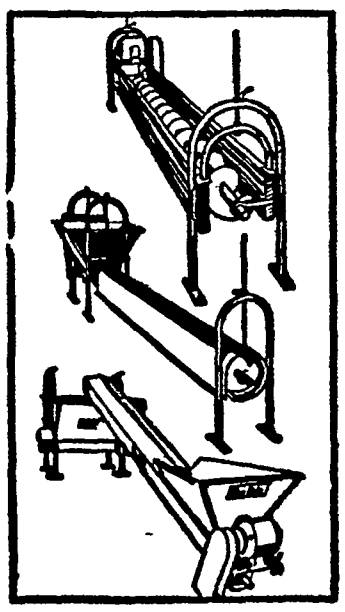


VanDale SILO UNLOADERS

Double augers deliver more silage per minute even when silage is deeply frozen . . . and at a lower operating cost. Patented V-paddle impellers *throw* . . . not blow . . . silage down chute. Adjustable drive hubs give positive traction in all types of silage.

Three-point suspension keeps unloader level at all times.

Plus a complete line of bunk feeders to meet your exact needs



Straight-out Auger Feeder

With VanDale units you can custom build the bunk feeding set-up to fit your needs. Drive section includes hopper, drive assembly and 16', high capacity 9" auger. Additional auger sections are in 16' units and are easily coupled.

Feed-R-Flo Bunk Feeder

The new, all-metal complete feeder. High capacity 9" auger rotates within tube. Gives all-weather protection, even feed distribution, and lower operating cost.

Conveyor Trough

An important link in automatic feeding. Positioned below silo chute, the VanDale conveyor trough carries the silage to the bunk feeder. Primary section includes hopper, drive assembly, and 16', 9" auger. Additional 16' auger sections may be added.

All-American Dairy Show Set For Next Year

Pennsylvania's second All-American Dairy Show, next September 13-17, will be patterned after this year's highly successful initial venture, but will be a day longer, State Agriculture Secretary Leland H. Bull said following a meeting of the show committee.

Again, the All-American will embrace the Pennsylvania Junior Dairy Show and the Pennsylvania Holstein Black and White Show. The junior event will continue in the opening day position, Monday, Sept. 13, with the Holstein show the following day

The main All-American, an open international show embracing the United States and Canada, will be held Wednesday, Thursday and Friday. This year's show closed Thursday night The extra day will provide added time for judging and afford visitors more time for seeing the show

Secretary Bull listed among the strong features of last September's opening event three breed sales, all of which drew national attention.

With experience gained from that show, next year's program should go even better, he said. Secretary Bull reported that the main exposition hall in the State Farm Show Building proved satisfactory as an auxiliary stable, and that a covering of plastic and shale adequately protected a tile floor.

Cuthbert Nairn, Douglassville, general chairman, said exhibitors were pleased, even enthusiastic, and that their inquiries about next year's show were an indication of their continued support. Entries at the first show totaled 2400 animals. They came from sixteen states and Canada.

Sponsors of the show are the State Department of Agriculture, its Farm Show Commission and the Pennsylvania Dairy and Allied Industries Association.

Pa. Turkeys Are Bigger And Better This Year

The Pennsylvania Department of Agriculture has a timely note for turkey fanciers Hens appear to be growing bigger and better

That's the conclusion drawn from a report of 849 hens that were dressed in the department's tenth Random Sample Turkey Test

Average live weight was 16 7 pounds compared to 16 05 pounds a year ago Large white hens showed the biggest gain—1 5 pounds

Birds this year dressed to 81 5 per cent of the live weight compared to 80 9 per cent last year

Finally, 99 9 per cent of this year's test flock were Grade A Last year, 98.8 per cent were rated Grade A.

Federal Crop Insurance Now In 8 Pa. Counties

Additional Pennsylvania farmers will be eligible for Federal Crop Insurance protection in 1965, the U S Department of Agriculture announced recently

Federal Crop Insurance investment protection on corn in Adams and Franklin Counties will raise the number of Pennsylvania counties with Crop Insurance to eight Wheat and barley will also be insured in the two counties beginning with the 1966 crop

Over $1 7 million in crop production investments was protected by Federal Crop Insurance in 1964

"An increasing number of Pennsylvania farmers,' said John N Luft, Federal Crop Insurance Corporation Manager, "are recognizing the need for effective protection of the money they must risk each year to produce their crops

"This is a cooperative program," Mr Luft stated, "which helps growers take a business like approach to the problem of protecting their capital investments, their credit, and their community economic strength

"When crop damage from drought, freeze, insects, disease or other causes hits a rural area, it hurts everyone for miles around — merchants, equipment dealers, bankers — every business and profession
